# MAKING CYBERCOM

Based on Cybercom's values and inclusive culture, we are developing skills, client offerings and employees.

This is how we are making Cybercom.

**Cybercom Innovation Zone**

# Future city

## Challenge

Gothenburgers need visualization tools to better understand the changes that their city will undergo, and to assist in the upcoming choices for a sustainable future.
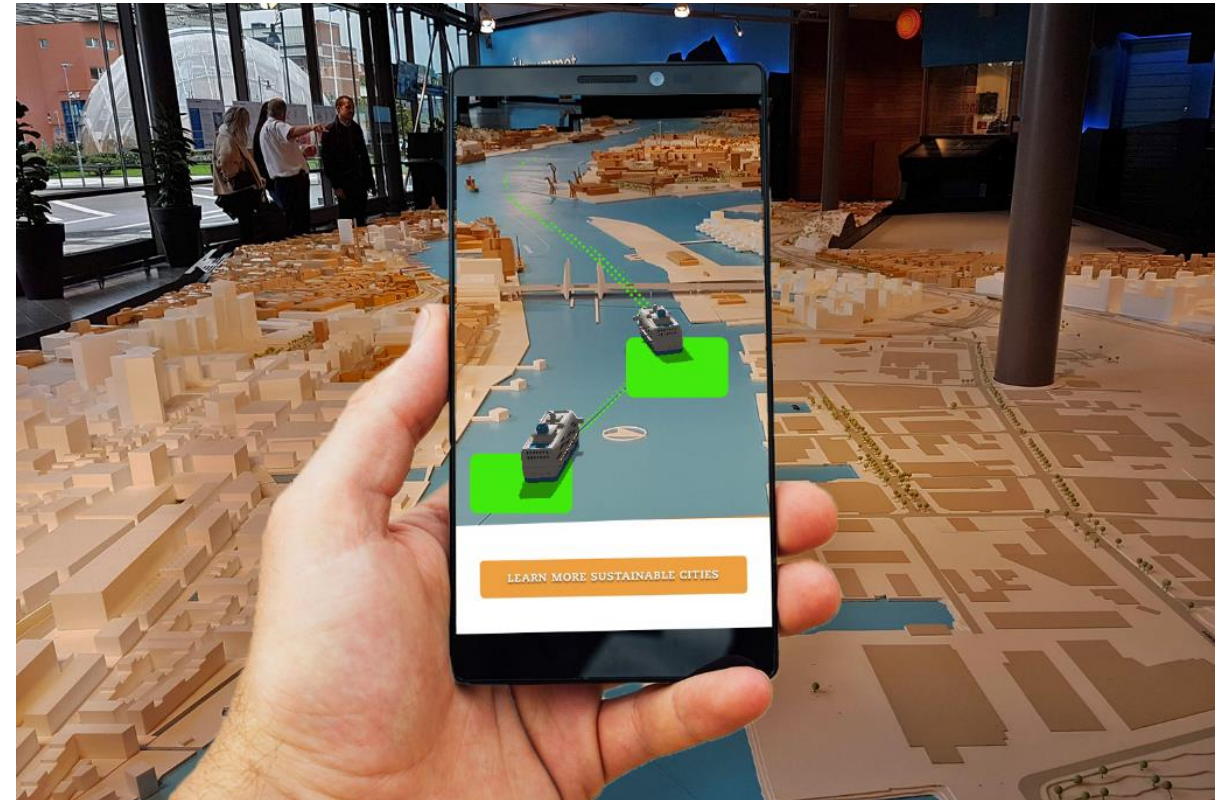

## Solution

In partnership with Älvrummet http://www.alvrummet.se/ and Science Park, the team will work together with the city to determine use cases an Augmented City initiative, to build upon what has already been created in terms of messaging, and translate it to mobile devices in a meaningful way.
